Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Claims 1-43 are presented for examination.

Claim Rejections - 35 USC § 101

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

3. Claims 1, 21, 31, 35, and 39 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

MPEP 2106 IV.B.2.(b)

A claim that requires one or more acts to be performed defines a process. However, not all processes are statutory under 35 U.S.C. 101. *Schrader*, 22 F.3d at 296, 30 USPQ2d at 1460. To be statutory, a claimed computer-related process must either: (A) result in a physical transformation outside the computer for which a practical application in the technological arts is either disclosed in the specification or would have been known to a skilled artisan, or (B) be limited to a practical application within the technological arts.

4. Claims 1, 21, 31, 35, and 39 are not statutory because the claims do not produce a tangible result.

The independent claims comprise a practical application, but the practicality of the application recited in the independent claims do not produce tangible results.

The examiner kindly requests that the applicants take a closer look at the claims and kindly amend the claims so that the claims produce tangible results. For instance, claim 1 recites collecting failed queries, receiving a topic selection, and then modifying a help file. Likewise, independent claim 39 recites a topic as a title derived from failed

user queries and content describing the topic. It appears that the apparatus or method of the independent claims is only performing an analysis of the queries as the queries relate to topics of the help file. The independent claims fail to produce tangible results.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-43 are rejected under 35 U.S.C. 102(b) as being anticipated by Coleman et al. (Pat. No. 5,859,638 filed February 4, 1997, hereinafter Coleman).

7. Regarding Claims 1 and 21, Coleman teaches collecting failed user queries; receiving a selection of a topic; receiving a selection of some collected user queries; and modifying the help file so that the selected topic is more likely identified as relevant to the user queries.

8. Regarding Claim 2, Coleman teaches selected user queries to an entry of the selected topic.

9. Regarding Claim 3, Coleman teaches data is added as metadata that is searched by a help system when determining whether a topic matches a user query.

10. Regarding Claim 4, Coleman teaches the help system weight matches within the derived data of topics more heavily than matches within the content of the topics.

11. Regarding Claim 5, Coleman teaches a search catalog of the help file.

Art Unit: 2167

12. Regarding Claims 6, 7, and 9-15, the limitations of this claim have been noted in the rejections of claims 1-5 presented above. It is therefore rejected as set forth above.

13. Regarding Claim 8, Coleman teaches queries are collected from user computer systems.

14. Regarding Claim 16, Coleman teaches an index and a content file.

15. Regarding Claim 17, Coleman teaches help file has a different language

16. Regarding Claim 18, Coleman teaches user queries are in the original language

17. Regarding Claims 19, 20, and 22-43, the limitations of this claim have been noted in the rejections of claims 1-18 presented above. It is therefore rejected as set forth above.
